

Surficial Geologic Map

The original map digitized by NPS staff to create this product was:

Crandell, D.R. 1969. Surficial geology of Mount Rainier National Park, Washington. USGS Bulletin 1288. 1:48,000 scale.

Digital geologic data and cross sections for Mount Rainier National Park, and all other digital geologic data prepared as part of the Geologic Resources Divisions Geologic Resource Evaluation program, are available through the Natural Resource – GIS metadata and data store:
<http://science.nature.nps.gov/nrdata/>

NPS Units	
	Mount Rainier NP
Hazard Feature Lines	
	Height reached by Osceola Mudflow
Glacial Feature Lines	
	crest of glacial moraine, approximate
Linear Dikes	
	Tdi - Diorite, quartz diorite, granodiorite, and quartz monzonite porphyries
	Td - Diabase and basalt
Surficial Contacts	
	approximate
	map boundary
	shoreline
	ice, approximate
Surficial Units	
	Qav - Avalanche deposits from Little Tahoma Peak
	Qavg - Avalanche deposits from Little Tahoma Peak (on Emmons Glacier)
	Qa - Alluvium
	Qac - Alluvial cones
	Qtr - Travertine
	Ql - Landslide deposits
	Qlm - Landslide deposits (moving in 1960-66)
	Qt - Talus
	Qbf - Block-field deposits
	Qmf - Mudflows
	Qg - Garda Drift
	Qgy - Garda Drift, younger
	Qgo - Garda Drift, older
	Qbb - Bomb-bearing deposits in South Puyallup River valley
	Qb - Burroughs Mountain Drift
	Qf - Interbedded mudflows and alluvium, units undifferentiated
	Qfd - Interbedded mudflows and alluvium, unit D
	Qfc - Interbedded mudflows and alluvium, unit C
	Qfb - Interbedded mudflows and alluvium, unit B
	Qfa - Interbedded mudflows and alluvium, unit A
	Qo - Osceola Mudflow
	Qp - Mudflow of Paradise Peak
	Qpt - Protalus ramparts
	Qm - McNeely Drift
	Qr - Rock glacier deposits
	Qv - Mudflow of Van Trump Park
	Qe - Evans Creek Drift
	Qh - Hayden Creek Drift
	Qod - Old Drift
	Qra - Volcanic rocks of Mount Rainier
	Tbr - Rock formations older than Mount Rainier
	Glacial Ice
	Water
